Revolutionary digital music-on-hold playback system supports MP3 and WMA audio formats. The unit has 64mb of on board memory preloaded with over 4 hours of great sounding licensed music content. The IAP Analog works with virtually all analog and popular KSU-less phones. The player also includes hold music activators that provide “true” hold button activation of your on-hold audio when connected to the handset cord of each phone.

### Features

- **Built-In Analog Phone Adapter Module** - Add music-on-hold to conventional analog and KSU-less telephones with up to 4 lines and 50 station sets. Works with all types of phones...even cordless.
- **USB connection** - Connect to your PC via USB to add new content or update firmware.
- **PC connection...strictly optional** - Unit uses PC only to update content stored in flash memory. Updated content can optionally be added by copying an MP3 or WMA audio file to a Secure Digital (SD) card without the unit ever being connected to a PC or network.
- **Ready to go right out of the box** - Pre-loaded with several files containing great sounding music mixed with intermittent “thanks for holding…” messages. Just plug it in and walk away. Anything else is completely optional.
- **Auto start after power loss** - Retains stored preferences such as: music selection, repeat mode and volume settings. If power to the unit is lost, unit immediately returns to continuous playback with all settings without human intervention.
- **LCD Control Panel** - 6 line backlit LCD panel displays ID-3 tags with descriptive names of tracks for easy identification and selection. Display also shows a variety of important information so user can choose playback preferences and easily determine unit’s operational status.
- **Flash memory** - 64MB of on-board flash memory stores over 4 hours (sampled at 32kbps) of awesome sounding content. Additional Secure Digital card (not included) can add over 70 hours of content for continuous playback (1GB SD Card).
Specifications

**Player/Recorder**
- On-board memory - 64MB
- Maximum Memory Supported – 1GB
- Supported audio standards – MP3 and Microsoft Windows® Media (WMA) digital music
- Supported bit rates – 32 – 320kbps
- External Memory Slot – Secure Digital (SD) Memory Card
- Interface – USB 1.1
- Playback modes – repeat one, repeat all, repeat all shuffle
- Audio output mode – mono (analog)
- ID-3 tag support
- Firmware upgradeable via USB or web connection
- LCD - 6 line backlit display
- Built-in monitor speaker
- Interface devices – USB port, RCA audio output, 2.5mm Power jack
- Minimum operating system (player - USB connection)
  - Windows - 98, 98 ME & SE, 2000, XP
  - Mac - OS 9.0.4 or later; OS X 10.1 or later
- Warranty – 3 year

**Analog Audio Output**
- 8Ω - 4 volts peak to peak
- 600Ω - 8 volts peak to peak

**Controls/Switches**
- Play/pause
- Volume up/down
- Skip up/down
- Power on/off
- Repeat mode
- Monitor speaker on/off
- Impedance 8/600Ω
- Power on/off

**Power**
- 12VDC @500mA
- Source -110VAC, 60Hz UL/CSA power pack

**Physical**
- Size: 9" x 7" x 2.25" (LWD)
- Weight: 3 lbs.
- Wall mountable

**Includes**
- Digital Player/Recorder
- USB Cable
- Audio Connector Cable
- AC Power Adapter
- 2 Cordless Phone Adapters (male)
- 2 Cordless Phone Adapters (female)
- 2 TEHMAs
- 2 Handset Cords
- 2 Phone Line Cords
- **“T” Adapters**

**Integrated Analog Phone Adapter Module**
- Built-in module allows the unit to provide on-hold audio capability to standard analog and KSU-less phone systems with up to four lines.

**Digital Flash Memory**
Stores audio in digital memory and retains it even after a power outage. 8kHz bandwidth produces incredible sound quality.

**Easy-To-Use Controls**
Just like any other Audio CD or MP3 player, the easy-to-use controls allow play, stop, volume adjustment, repeat mode and the ability to select which digital audio file to use for your on-hold audio.

**Secure Digital (SD) Memory Card**
Insert a Secure Digital (SD) memory card (sold separately), and have over 70 hours of continuous on-hold audio (1G SD Card).

**The TEHMA**
TEHMAs (Telephone Extension Hold Music Activators) give your phone extensions true “hold button” activation on-hold audio. (2 modules included, additional modules available separately)
